

Master BC121 Evaporative Cooler Sales Specification Sheet

Description:

The BC121 evaporative cooler offers a cost-effective alternative to traditional air conditioning and create a comfortable working environment for your employees or customers. Evaporative coolers cool the air using a simple natural process: the evaporating water decreases the temperature of the air. A pump takes the water from a tank and dampens a large pad made of natural cellulose. A powerful ventilator aspires air through the filter. The water evaporates from the filter and decreases the temperature of the air by several degrees. The fresh and clean air flows into the room and cools it down.

The Master BC121, BC221 & BC341 all come with a built in UV Lamp, the Ultra Violet light disinfects the water and also cleans the air reducing the risk of bacteria and viruses without need for using chemicals.

Product Code: BC121

Specification:

Power Supply: 220 - 240v 50Hz

Air Flow: 12,000 m³/h
Maximum Area: 250 m²

Power Consumption: 500w

Water Consumption: 8 - 10 l/h

Water Tank Capacity: 60l

• Direct Water Connection: 1/2"

Sound Level: 67dB(A)

• Dimensions: 105 x 60 x 146 cm (LxWxH)

Weight: 50kg

SALES: Telephone: 0845 3090707 Email: sales@hscgroupuk.co.uk
