

Description:

An indirect oil-fired heater is a portable or fixed unit that can generate a large volume of clean, fume-free warm air heating. To do this, these heating systems harness the power of combustible fuels, such as oil and bio fuel.

Unlike direct-fired space heaters, these types of systems isolate a flame, preventing it from directly combusting with the flow of air. By relying on a highly efficient heat exchanger to transfer this energy, warm exhaust air is free from unpleasant and unsafe pollutants like CO₂.

As a result, indirect oil-fired heating systems can be used safely inside spaces with reduced ventilation, as well as outside areas.

Complemented by a full range of accessories including digital thermostats, ducting kits and exhausts there is a package for most indirect heating requirements.

Product Code: BV290DV**Specification:**

- Power Supply: 110 - 240v 50Hz
- Heating Power: 85kw (290,000 Btu)
- Energy Consumption: (110v @ 1012W) (240v @ 1104W)
- Air Volume: 3300m³/h
- Tank Capacity: 105ltr
- Fuel Consumption: 8.1l/h
- Dimensions: 160 x 70 x 115 cm (LxWxH)
- Weight: 101kg
