

Description:

The New DHP55DV not only has a corrosive resistant rotomoulded body, dual voltage (110 & 240 Volt) but it also has a discharge pump fitted as standard for continuous operation making it perfect for hire! Please note: The DHP55DV does not come with a water tank supplied and is available to order as an optional extra, Part Reference: 4250.320

Dehumidifiers are used for a number of applications and help reduce humidity levels making you less hospitable to allergens, dust mites, mold and mildew and also help speed up the drying process of newly plastered rooms.

Used extensively following flooding or water damage a dehumidifier when placed in an affected room will when used within its operating temperature range effectively remove excess moisture. Another great use for a dehumidifier is for drying Plaster or Artex allowing you to finish decorating the room even sooner.

Product Code: DHP55DV

Specification:

- Power Supply: 110v - 240v 50Hz
- Capacity (30°C / 80% RH): 45.9 l/24h
- Air Flow: 340 m³/h
- Operating Temperature Range: 5°C - 35°C
- Power Consumption: 790w
- Automatic Water Pump
- Maximum Pumping Height: 3mtr
- Dimensions: 60 x 45 x 88 cm (LxWxH)
- Weight: 47kg
