

Description:

The TTK Qube combines all the performance requirements of a professional living room dryer - compressed into an ultra-compact design.

The TTK Qube doesn't make water damage drying itself easier, but it is much easier to handle. The TTK Qube is a high-quality, high-performance condenser dryer, which was developed based on three premises: maximum dehumidification performance and ease of maintenance, minimal dimensions and weight, and the lowest possible noise development for use in an inhabited environment.

Compared to cheaper rotary piston compressors, the high-quality 0.37 kW rotary compressor of the TTK Qube offers the advantage of higher performance with comparatively lower power consumption - and creates additional reserves for high dehumidification performance even in unheated rooms. Additionally supported by a comfort function for extra quiet dehumidification - ideal for water damage restoration in an inhabited environment.

In addition, the high-quality hot gas automatic defrosting system of the TTK Qube ensures a much more efficient dehumidification performance compared to other defrosting systems without time-interval-related defrosting pauses in which no dehumidification takes place! The condensate can also be discharged across floors via the external outlet, as the standard condensate pump is designed for a delivery height of up to 10 meters.

Product Code: TTKQ

Specification:

- Power Supply: 220v - 240v 50Hz
- Capacity (30°C / 80% RH): 20 l/24h
- Air Flow: 383 m³/h
- Operating Temperature Range: 5°C - 35°C
- Power Consumption: 362w
- Automatic Water Pump
- Dimensions: 31.5 x 38.2 x 34 cm (LxWxH)
- Weight: 16kg
